Subject: Against HB2705, HB2706, HB2707

Please vote against HB2705, HB2706, HB2707 as they do not take into consideration the water users and stakeholders impacted. They offer no benefits to Oregon or the typical water users in my area. It is hard enough to make a living farming without having to fight tax paid representatives and bureaucrats. It would be nice to see our representatives reduce costs and regulation burdens instead of increasing them. Your help to stop these bills would be appreciated.
