Subject: SB 869 – Support

I am writing in support of SB 869 regarding informed consent. I think informed consent is important so that the parents and patients know all the information prior to the medical procedure. Without informed consent, there is not enough information to make the best decision for the patient.

For myself, whenever I have a medical procedure done, I want to be fully informed about risks and benefits, so that I do not blindly go into the procedure.

I hope you vote in support of informed consent.
