BACKGROUND:

According to the 2015 American Community Survey one year estimate, 15.4 percent of Oregonians live in poverty. For someone to be considered to be living in poverty in a four person household, that household would have to make \$24,250 or less in a year. An individual living alone would have to make \$11,770 or less to be considered to be living in poverty.

House Bill 2534 would create the Community Leverage Fund (Fund) to be administered by Business Oregon. The bill would allow community organizations to propose projects to the Fund that improve outcomes related to health, early learning, economic development, and education. House Bill 2534 also stipulates that grants and loans given by the Fund must be made in roughly equal proportions through the state's economic development regions.
