

**Subject:** Support of SB 914

Dear Senators/Senate Committee on Health,

I am a resident in Umatilla County and in support of freedom to personal health choices. I believe all people, adults and children alike, need to have the proper education about vaccines before being administered. Risks are often overlooked when it comes to vaccinations, therefore many people require them. I find it a personal, human and medical invasion to require a vaccine for employment! We have many laws that protect our human rights and personal rights, including medical privacy. The fact that employers require to know your vaccine history and/or require vaccines be given for your employment status is injustice! Many people are healthy and thriving without vaccines. There are numerous cases where people get ill from vaccines. I am all for the freedom of choice, education of proper nutrition and hygiene to help prevent future issues.

I appreciate your time and consideration of the matter. Hope to see great results on March 28th's hearing!

Sincerely,

**Meagan Reser**
