

Subject: Support of SB 580

Dear Senators/Senate Committee on Health,

I am a resident in Umatilla County and have voiced my support of *informed* consent previously. I believe all people, adults and children alike, need to have the proper education about vaccines before administered. With this Senate Bill 580 proposal, it is requiring health care providers who are administrating vaccines to give information on Oregon's exemptions. I am VERY proud of Oregon and standing by our United States freedoms; including the freedom of vaccinations. Oregon is becoming one of the few who keep their people in mind and stand by the 3 types of exemptions for vaccines. I personally am thankful for this. I hope we can now go out and properly education and inform families of these exemptions before requiring children to be vaccinated...

I appreciate your time and consideration of the matter. Hope to see great results on **March 28th's hearing!**

Sincerely,

Meagan Reser
