Subject: support for Cleaner Air for Oregon

Dear Beth Patrino, Committee administrator

I have just sent this email to Senator Brian Boquist, and representative Mike Nearman. I would like my support of House Bill 2269 to be entered into the official record.

Please vote for the bill that supports research to provide cleaner air for Oregon! I'm one of the people who gets bronchial asthma from diesel pollution, and this bill would help me a lot! Just driving on our freeways frequently makes me stuff up and start to have problems breathing. Please help turn this around by supporting House Bill 2269.

Sincerely, your constituent,

Nina Joy Lawrence
