Subject: Clean Air - HB2269

Hi,

Please support HB 2269 to fund the critical work of Cleaner Air Oregon. Having two little kids, it's very important that I know the air they are breathing to be clean as possible. It's critical that we take the initiative as a state to implement rules that hold polluters accountable for what they emit into the air. I know it's possible to spend money now to help reduce pollution and save money later on health care costs. We can keep industry here by using filter technology. This takes funding and that's why you should support HB2269.

Thank you,

David Kirchfeld
