Dear Chair Dembrow,

Are you aware that the French Government did a multiyear study on the effect of neonicotinoid insecticides and could find no effect on the health of honey bees. Why would you want to throw useful tools away or make them so impossible to use. This is another sky is falling, Henny Penny approach to science that you as legislators have no clue about. Let this bill die in committee and get to work cleaning up the social programs and balance the budget.
Ron

Sincerely,

Ronald Quiring
