

SB 869 SB914 and SB580

I am the mother of a six year old. No one should be able to make medical decisions for my child or administer medical treatment to my child without permission from me or her father. There are so very many things to consider when making medical decisions and who else is going to know all of these factors aside from a child's parents?! The impact of an ill-informed medical decision can have fatal or life-long consequences. No one should be able to make such potentially grave decisions for my child.

Thank you,
Angel O'Brien
