Dear Chairwoman Mones-Anderson and members of the Senate Health Committee

**Support for Stronger Informed Consent Vaccination Policies--SB869; SB580**

Vaccinations have been described by the United States Supreme Court as "**Unavoidably Dangerous**". As a citizen scientist and parent, I cannot in prove in absolute terms, that my son did not fair well from his childhood vaccinations. However, I can make a compelling case. What I can say in absolute certainty, that I did not make an informed consent for his vaccinations. **SB 869 & SB 580** together would make the possibility of truly making the medical procedure known as vaccination safer(but not safe) by giving parents more information to empower their informed consent process for each antigen and vaccine excipients in each vaccination. Had I been armed with this information, I would have truly made a more informed decision regarding the vaccination of my son.

**SB 869 & SB580** are desperately needed legislation to begin to address the lopsided one-size-fits-all reckless, bloated and unproven safety of the CDC recommended vaccination schedule. These bills will help address the bullying of zealous doctors (who have immunity from from vaccination accountability) arming parents with more information for discussion about this controversial medical procedure. The current CDC recommended vaccination schedule has never been proven safe in spite of repeated demands from parents, doctors, scientists calling for vaccinated vs unvaccinated outcome studies, clinically proving the safety of the 69 doses of 16 vaccines by age 18. Until such time as the clinical safety, and long term health of this inherently risky (we are still injecting mercury into children and pregnant women) medical procedure, then we must strengthen the informed consent process. **SB 869 & SB 580** are only the first steps. We must do more!

The long-term health of our children call for prudent and wise legislation, exactly represented by **SB 869 & SB580.**

Respectfully submitted,

Michael Framson  
Medford, OR 97504
