Please fully fund the Oregon Department of Fish and Wildlife's Water Quality/Quantity Program – POP 108
The Governor's Recommended Budget does not currently include funds for instream flow positions, but I oppose any cuts to ODFW's Water Program, which is already unfunded.
We all know there are increasing pressures on our state's water resources; so POP 108 is more important than ever.
Support water, which is life.
Thank you,
