To Whom It May Concern:

Re: Proposed Amendment to ORS 455.715, 455.723, 455.732 and 455.740 – 2017
Session – LC 1874

The City of Cottage Grove is in favor of the proposed changes to the definition of “Specialized Building Inspector” proposed in the bill to come before the legislature this session. The bill will correct the mistake that was made in 2013 when the definition was changed to make it almost impossible for small jurisdictions to efficiently operate a building inspection program.

The current law limits the number of certified inspectors available to City and County building departments. There currently is a vast shortage of qualified inspectors available to provide timely service to public entities and the private construction industry in Oregon. In the rural communities especially, the lack of available inspectors drives up permit costs and increases inspection wait time.

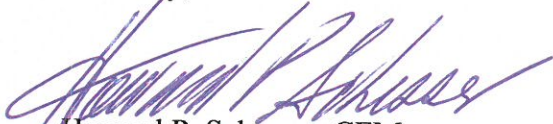

My understanding is that the current law arbitrarily sets a double standard for individuals employed by a jurisdiction and those providing the identical service to a local government through a qualified and certified 3rd party contractor. Smaller jurisdictions cannot afford to hire full-time publicly employed inspectors and maintain reasonable building permit fees. Allowing jurisdictions to contract with certified building inspectors saves public resources and time and guarantees that minimum building codes are being met.

The solution to the problem is to amend the above noted sections to change the definition of “Specialized Building Inspector” in ORS 455.715. The proposed language that I reviewed in the proposed draft LC 1874 would allow jurisdictions to contract with properly licensed and certified inspectors or companies to act as Specialized Building Inspectors. This change will allow for a jurisdictions to provide efficient and timely response to builders’ needs; increase the availability of certified inspectors; reduce inspection costs and wait times; and standardize rules for building inspectors state wide.

I believe that this proposed change is in the public interest while protecting the integrity of

the various adopted Oregon Specialty Codes. Thank you for your consideration.

Sincerely,

Howard P. Schesser, CFM
