Subject: Land use and out buildings

Mr. Rosenberg: I live on a small plot on Sauvie Island. This is to oppose proposed legislation currently before your senate committee which would effectively negate all land use rules and statutes that protect against urban sprawl.

The bill looks to me like a campaign to eliminate open space preservation which has been the product of years of thoughtful public policy. Particularly on Sauvie Island this open space policy has meant the continuation of farm lands that serve the area's food needs and recreational needs. Succumbing to development pressure is just not intelligent public policy. It is always there and has historically demonstrated that such development had failed to serve any but the greediest among us.

Thank you,
Joe McCray
