

Chair Clem and members of the committee,

I'm Clair Klock, a retired farmer from Corbett, OR. The integrity of prime farmland has been whittled away at for decades. I urge your opposition to HB 3050. There should be no exception to building of non-farm structures on EFU (Prime farmland). We are continuing to do a disservice to future generations when this activity is allowed. Solar developments are no exception.

Thank you.
