

HB 3263: School Based OT

Cat McGovern- Zlotek OTR/L

Attn: House Committee on Education

As a practitioner who makes referrals to school based OT I can say that as caseloads climb parent perspective on the helpfulness and availability of OT at school has fallen. If you could advocate for caseload limits similar to what Washington state has that would go a long way to fixing the problem, and create jobs for OTs and OTAs. We had a therapist working for us that took a job in Washington state for that particular reason.
