March 31, 2017

Dear Chairman Dembrow and members of the Senate Committee on the Environment and Natural Resources,

**BEES** and other pollinator populations will depend on the **SB 929 provisions**.

**FARMERS** depend on **BEES** and other pollinators.

**PEOPLE** depend on **FARMERS** who depend on **BEES** and other pollinators.

Some people will say that **SB 929** is *redundant* to regulations on neonics at the federal level....true. However, the regulations at the federal level are regulatorily inadequate and scientifically outdated, which is why the Oregon legislature needs to invest in this bee legislation.

**BEES HAVE NO REDUNDANTS and GOD (or the Oregon legislature) forbid we will have no bees.**

Respectfully submitted,

Michael Framson

Medford, OR 97504
