It is critical to the future of Oregon cities (and the state in general) that the right to vote for annexations be restored to the electorate, please pass SR 114 and SR 258 out of committee - with a strong recommendation to pass them in the general assembly. I cannot believe that any senators voted to take away our vote on any matter, particularly one so important as this, and it is your duty as representatives of the people of this state to restore that vote. Thank you
