Dear Committee members,

I'm writing today to encourage you to stop advancing these five bills, which together threaten Oregon's nationally renowned land use planning system. These bills represent short sighted solutions to economic development in rural Oregon. Instead why not seek solutions that include state investment in transportation infrastructure, education and work force training, communications infrastructure, and R&D of new productive that take advantage of rural Oregon's true assets?

Stop the sprawl!

Thank you for your consideration,

Tom Booth
Neskowin, Oregon
