Hello, Senate Committee on Natural Resources

I work with children with special needs, highly vulnerable to toxic chemicals in Children's Products and the environment. I wholeheartedly endorsed the Toxic Free Kids Act that was passed in the past, and would much like to see OHA be given the resources they need to support and carry out the bill as intended. Please do not pass SB 836, which would make unnecessary obstacles that would only benefit the chemical industry.

Thanks!

Marjorie Kircher, MS OTR
