**Subject:** SB 687 - for freedom of choice in medical care

To whom it may concern:

I would like to voice my strong support of wording that would ensure parents are not penalized for freedom of choice in medical care and vaccinations. There is ample evidence to support caution in vaccinations and no evidence at all that shows that the CDC schedule in its full extent is entirely safe.

Freedom of choice is central to our country and needs to include this very critical right.

Please add wording preventing any consequences for parents who choose alternative vaccination schedules or choose not to vaccinate.

Thank you,

Ashley Corey, RN
