

Dear Representatives,

I am writing on behalf of the Landscape Technology Program at Portland Community College (PCC) to state our united opposition to HB 3337. The Oregon Landscape Contractors Board has worked with the industry for many years to develop a testing and licensing framework that ensures safe, quality work from landscape professionals and protects consumers. HB 3337 goes in the opposite direction and will have a negative impact on landscape professionals, consumers and the industry as a whole. We strongly urge you to vote in opposition of HB 3337.

Sincerely,

David Sandrock
