

The Oregon Promise grant is one of the most important pieces of the puzzle in order to get our population of high poverty students from high school into college. We believe that any and all students can go to college as they strengthen their executive skills, academic knowledge, and study skills. That, unfortunately, is not enough; students need help paying for college and many do not go simply because of money. This grant has allowed so many more students (second language learners, first generation-college goers, and homeless youth included) to get on a college campus and begin their journey. Please help me help our youth to continue to grow and mold the society that we want to live in.

Thank you,

Lori Leedy
