House Committee on Health Care  
Support House Bill 2310 – Implementing Public Health  
Modernization

To whom it may Concern,  
Oregon's 34 local public health departments focus on protecting children and families by preparing for, preventing and responding to illnesses and injuries caused by a variety of factors. We are submitting this letter to support HB 2310 and funding to implement the first phase of Public Health Modernization

InterMountain ESD supports HB 2310 with an amendment that will include the recommendations for 2017-19 implementation made by the Public Health Advisory Board to implement aspects of the Communicable Disease and Environmental Health Foundational Programs and Assessment and Epidemiology, Leadership and Health Equity Foundation Capabilities. These areas build off current capacity with a focus to greater accountability to improving health outcomes.

To do this, Oregon's public health system needs funding. We simply cannot afford to leave our public health departments underfunded and without adequate public health infrastructure until a horrific epidemic, disaster or outbreak occurs. Supporting public health will ensure fair opportunities for health and eliminate gaps in health outcomes, slow the spread of Chlamydia, Gonorrhea and Syphilis and other communicable diseases, improve childhood immunization rates, and increase community capacity to identify, and respond, to environmental health hazards.

Redefining and expanding the work and expectations of public health can help improve the conditions that create opportunities for health. Public Health is critical to the collective impact of our region. As the lead for the Blue Mountain Early Learning HUB and Eastern Oregon RAC, IMESD depends on the leadership, support and resources from our public health partners to meet regional goals.

The work of Oregon's local public health departments is essential to the health of communities across our state. IMESD urges your support of house bill 2310.

Sincerely,

Mark Mulvihill, Ed. D, IMESD Superintendent
