SB871, amended
Committee on Environment and Natural Resources
Submitted by: James Gorter, jcgort@msn.com
April 10, 2017

I want to thank Senator Denbrow and Representative Keny-Guyer and others for sponsoring SB871 and for pursuing this important issue.

I wish to address two key issues to strengthen the bill's goals of protecting public health and the environment.

1. Require applicants for demolition and major remodel permits to include copies of asbestos and lead inspection reports and mitigation plans with with permit application
2. Require the permitting agency to notify oversight agencies (DEQ, OSHA, OHA, CCB) of the permit application and issuance.
3. Allow, or preferably require, the issuing agency to verify and enforce surveys and abatement.
