Hello,

I wish to voice my support the proposal to let cities like Portland set and control their own speed limits. I believe that city officials are in the best position to decide what's best; they understand the particulars of how a roadway operates better than a state official, and are more directly answerable to the public for their decisions. While it may be appropriate for state officials to offer guidelines and advice, the final determination should be made locally.

Thank you,

Chris Eykamp
