

Rather than attack the foolish and dangerous particulars of these bills, I would observe again that all such tinkering with the Second Amendment bears the seeds of totalitarianism. Legislators legislate; that's what they do. Answer three questions:

1. Does this firearm legislation further empower government?
2. Does this firearm legislation further reduce the personal liberty of honest citizens?
3. Are criminals unaffected by this firearm legislation?

If the answers are "yes," we know that legislators with a totalitarian mindset are at work.
