

Dear Chair Clem and members of the Committee:

As an Oregonian who values wildlife for its intrinsic value, and who wants our state's wildlife managed humanely and responsibly, I urge you to support HB 3228. This important legislation will require that nongame wildlife be managed for its intrinsic value, and thereby provide a means for all Oregonians to have a voice in how our wildlife is managed, not just the small but vocal minority who wants our wildlife managed solely for hunting, trapping, and other consumptive uses. Please vote YES on H.B. 3228!
