---

Dear legislators and all of the state agencies.

We members of the HIGH LAKES AQUATIC AND ALLIANCE FOUNDATION (HLAAF) do want you to support all of the articles in HB 5422 in addition to HB 5010. This legislation is vital to Oregon's waterways and especially true for the Drought impacts on Oregon's ephemeral saline lake Aberts ecology. Please help us save this vital habitat for the Pacific Migratory Bird Flyway. If you want more information about what HLAAF is doing please contact the following

<https://hlaaf.wordpress.com/> in addition if you wish to have a copy of my book that is being sold on Amazon Books. and whose title is CLIMATIC DROUGHT IMPACT, OREGON'S SALINE ECOSYSTEM..... LAKE ABERT.. If you would want a free copy please send me an email. Thank you for taking the time to read this short message.  
Cheers, Frank
