Subject: Testimony on HB 5542, OWRD Budget
Date: Wednesday, April 12, 2017 12:06:53 PM

As a bird and wildlife watcher, I am very concerned about our continued overuse and degradation of Oregon's waters. I strongly support Package 101 in HB5422 and believe that we must know what is happening to our water in Oregon. I also support package 105 that would provide people on the ground to monitor what is happening with our water. With the increasing threat of effects from global warming, our water has never been more important to our quality of life and our economy.

Thank you,

Candice Guth
