

You need to fix the broken Oregon Background check system before you burden honest Oregon Citizens with more background check laws. Example: one day a customer can pass the background check system and later when he/she wishes to purchase another firearms sometimes only weeks later they fail the background check for no apparent reason. It can take months before that check is cleared. In the mean time they can go to another retail outlet and pass another background check while the other one is still pending. The system is a big mess.
