

To whom it may concern,

I am a practicing Chiropractor in Portland with 32 years experience. I can say that the current onerous pre-authorization requirements mandated by eva core are an incredible hindrance to my rendering care to my involved patients. I cannot take the time to pre authorize every patient who needs this time consuming process. I will simply have to quit seeing these types of patients if this system remains in effect. I do not believe this system of screening patients is fair to chiropractors and other alternative health providers.
