

Representative Clem and Committee Members

I am very concerned about HB 3429 undermining Measure 100 that was about reducing trafficking of endangered species last year. It was overwhelmingly passed with many people working hard to get support for it. Please do not pass HB 3429 as is will do less to protect endangered species. Measure 100 was well thought out and supported by the majority of Oregonians.

Thank you for your consideration in this matter.
