Please advance, support, pass a strong SB 797. It is so important that people who have demonstrated that they choose to hurt others not have guns. As a person of faith I believe in the belovedness of every human being and the responsibility of communities to cherish and protect lives so everyone has a chance to live their life. Some people can't control themselves or are likely to make deadly decisions with firearms - signs like past violent convictions let us know who can't handle the responsibility of deadly weapons. It is your responsibility with the power of law to protect citizens from gun fire and loss of life -law enforcement and emergency responders, children in schools and their teachers, people at malls, at their jobs, in their homes and neighborhoods. Please act bravely and treat your duty seriously. Inconvenience in having to wait to receive a firearm does not outweigh public safety. Thank you.
