Senator Brian Boquist, Chair
Senate Committee on Veterans and Emergency Preparedness
Oregon State Capitol
Salem, OR 97301

Re: SB 7 - Support

Chair Boquist, Vice-Chair Monnes Anderson, and Members of the Committee,

We write in support of the goals of SB 7. We strongly oppose expansion of oil and coal transportation (including by rail) in Oregon – and support the steps this bill takes to reduce the threats they pose to our state.

Climate Solutions is a regional non-profit working to accelerate practical and profitable solutions to global warming. For more than 15 years, Climate Solutions has been working to implement energy efficiency, renewable energy, and carbon reduction policies that demonstrate that clean energy and broadly shared economic prosperity go hand-in-hand.

As a member of the **Stand Up To Oil Coalition**, Climate Solutions opposes the expansion of oil terminals and an increase in oil transport through the Northwest, while working to improve safety measures for oil currently traveling through the region. These projects put our communities at risk from explosive oil train derailments, huge increases in rail traffic, and spills from trains, tankers, and barges. And each additional project adds to the problem of carbon pollution and climate disruption. Dangerous types of oil – volatile Bakken crude from the Midwest and toxic tar sands oil from Canada – pose unique risks to public health and the environment.

SB 7 is a step in the right direction to improve the safety of flammable oil being transported by rail near our state's many treasures: our towns, our natural places and our people. The requirement for proof of financial responsibility in case of a worst case oil spill is necessary to hold railroad companies responsible given the high risks posed by these hazardous oil trains and the frequency of spills and explosions. Last summer's devastating explosion of an oil train in Mosier serves as a prominent example of what Oregon must protect against in the future.

Pioneers in energy efficiency, renewable energy, and sustainable fuels call Oregon and the Northwest home for a reason. We can succeed economically by innovating, commercializing

and marketing energy strategies that reduce fossil fuel dependence, promote clean development, and deliver real climate solutions.

We urge you to vote yes on SB 7 for Oregon's health and safety. Thank you for your consideration of these comments.

Sincerely,

Meredith Connolly
Oregon Policy Manager
