

Since any intelligent person would see that the amendments to this bill will not protect people from gun violence. I must assume that the backers have another agenda than the one stated, since these senators are not stupid, and that agenda must be to ultimately confiscate all guns and disarm everyone. In short to subjugate the US Constitution to their wishes, to ignore the rule of law upon which our nation was founded and on which it has thrived for 200+ years. And so will add another step in the erosion of our form of governing which inevitably must end in more of our constitution being negated for personal wishes of those in power.

Stop this bill from becoming law
