Dear Senators,

The role of government is to do the least amount possible to maintain a civil society. In creating and trying to implement poorly thought out and worded legislation you hamper the democratic process. The point of our government system is to protect the citizens Liberty. Every time that you try and pass legislation that “protects” the few at the expense of the many you are acting in direct disregard for the citizenry as a whole. Our founders trusted the citizen and the government body to act in accordance with Natural Rights and the common sense of the individual. You on the other hand brandish your position of power in order to limit the citizen’s rights and choices to make good or bad decisions. Life is inherently dangerous. The great majority of the people make good and just choices every day. Some do not. But we cannot fall victim to creating unjust and unconstitutional laws. We as a civil society must trust the citizens to act with Justice and Liberty. Selling the natural rights of the citizen for what appears as an emotional response to some people’s fears is not in accordance with the stated goal of our Constitutional government. Our government was established for the purpose of protecting the individuals Natural Rights, one of which is the right to keep and bear arms without overreaching government controls.

Vote NO on SB 797, SB868, SB897
