

We should all be very wary of stripping law abiding citizens' rights through simple accusations. An angry family member or friend could have your rights stripped forever as this legislation ultimately seeks to accomplish. This bill doesn't regard someone who actually may be a concern as anyone but someone who has property they personally don't agree with. Where is the investigation? The charges? The adjudication? There will never be any addressing of the concern or help resources offered to the person in question guilty or not. Please trash this stupid idea and do something to actually help Oregonians. Wasting time on bills like this helps no one.
