

To whom it may concern-

Please keep the Constitution in mind when voting on SB's 868, 797, and 764.

Firearms crime is at a multi-decade low. Concealed handgun license holders are some of the most law abiding citizens you will ever meet, and current requirements to carry a firearm are already unnecessarily burdensome. There is nothing at all to be gained by making that process more difficult, except to make exercise of a Constitutionally protected intrinsic civil right more difficult.

Lastly, we are a government WITH representation. This last-minute end run around the opposition, with almost no time for counterpoint or discussion, is a clear attempt to circumvent that protection against government over reach. This is not an emergency situation, there is no need to rush this, there is plenty of time for discussion and examination of the data. These blatant attempts to usurp power from we the people, without time to defend ourselves, needs to be stopped.
