Hospital Errors are the Third Leading Cause of Death in U.S., and New Hospital Safety Scores Show Improvements Are Too Slow

Washington, D.C., October 23, 2013 – New research estimates up to 440,000 Americans are dying annually from preventable hospital errors. This puts medical errors as the third leading cause of death in the United States, underscoring the need for patients to protect themselves and their families from harm, and for hospitals to make patient safety a priority.

Homicides in America

From Crime in the United States, 2015

How many Rapes, robbery and aggravated assaults would not have happen if we as a free people would enact our constitutional rights.

This is only going to get worse if we lose out right to protection our right that was founded by great men who had the foresight.

I didn't have enough time to complete such a "very important" research.

To the members of the Senate of Oregon

Don't take our constitutional right from us.
