**Subject:** SB 874

Co-Chairs, Members of the Committee:

Given the allegedly "robust" tracking and security requirements imposed upon OLCC licensees, what does SB 874 bill seek to accomplish?

Is METRC, camera placement, etc. insufficient and thus a waste of resources? How much diversion from licensees has been documented and verified?

Finally, how will SB 874 be enforced?

This seems like a far-fetched bill that does little more than perhaps assuage certain political diversions. It certainly appears to compromise the integrity of METRC and other expensive systems currently in place.

Given the importance of the committee's remaining work, I suggest you not waste any more time on this unenforceable and unnecessary piece of legislation.

Thank you.
