

## HB 2722 STAFF MEASURE SUMMARY

### Senate Committee On Environment and Natural Resources

---

**Prepared By:** Beth Patrino, LPRO Analyst

**Meeting Dates:** 5/4, 5/10

---

#### WHAT THE MEASURE DOES:

Makes void and unenforceable any provision of condominium or planned community governing documents that impose irrigation requirements while any of the following is in effect: 1) declaration by Governor that drought exists or is likely to occur; 2) finding by Water Resources Commission that severe or continuing drought exists or is likely to occur; 3) governing body of political subdivision requires conservation or curtailment of water use; or 4) association adopts rule to reduce or eliminate irrigation water use. Authorizes association for planned community or condominium to adopt rules that require the reduction or elimination of irrigation on any portion of the planned community and permit or require the replacement of turf or other landscape vegetation with xeriscape. Authorizes association to require prior review and approval by association of any plans by unit owner to replace landscape vegetation with xeriscape and requires the use of best practices and industry standards to reduce landscaped areas. Defines terms and reorganizes certain provisions within each statutory series. Declares an emergency, takes effect upon passage.

*No fiscal impact, no revenue impact*

*House Vote: Passed. Ayes, 57; Nays, 1--Nearman; Excused, 2--Boone, Power*

#### ISSUES DISCUSSED:

- 2016 legislation prohibiting homeowner associations from fining residents for watering lawn during declared drought (SB 1529)
- Existing process to change rules; high vote threshold requirement
- Interim work group process

#### EFFECT OF AMENDMENT:

No amendment.

#### BACKGROUND:

According to the report of the Task Force on Drought Emergency Response, drought is not an abnormal event in Oregon, with notable droughts occurring in 1976-77, 1992, 2001-02, and 2015. In 2015, Oregon experienced severe to extreme drought conditions across the entire state, according to the U.S. Drought Monitor. The 2015 drought was prompted by warmer than normal temperatures, record-low snowpack, and, in some parts of the state, below-normal spring and summer precipitation. The result was record-low to near-record-low streamflows in most parts of the state. The Governor declared drought in 25 of Oregon's 36 counties, the most since 1992, when a statewide drought declaration was issued.

In 2016, the Legislative Assembly enacted Senate Bill 1529 which prohibited the enforcement of irrigation requirements imposed by homeowner's associations following a finding, declaration or adopted ordinance of existing or likely drought conditions. House Bill 2722 would extend this prohibition to both condominiums and planned communities by making irrigation requirements void and unenforceable while certain drought declarations, findings, conservation requirements or association rules are in effect. The Act would also authorize a planned community or a condominium association to adopt rules to require the reduction or elimination of irrigation and allow or require the replacement of turf or other landscape vegetation with xeriscape.
