---

I urge passage of HB 2027 to ensure that the state provides legal foundation for the basic position to protect wild rivers on upper deschutes. Legislature has had a tradition of supporting environmental impact on wildlife riverlife humanlife and the paces to preserve for our future generations.

Thank you for your consideration when we're in a time of attack by special interests to ignore the importance of wild places on our mental and financial health.

Fred J. Saporito, PhD
