Subject: Oppose House Bill 2027
Date: Saturday, May 06, 2017 9:35:21 AM

We want to express our opposition to, and encourage our Oregon State Senate to defeat this ill-considered legislation.

A foot-bridge across the Deschutes at the south end of Bend would have little if any effect on wildlife in our opinion. And the ability of hikers on the east side of the river to continue across the river and access the existing trails along the west side in the Deschutes National Forest would only enhance the recreational opportunities that make our community a wonderful place to live.

Please ensure that House Bill 2027 is defeated in the Senate.
