Subject: House Bill 2027 Whisnant's gut and stuff
Date: Saturday, May 06, 2017 11:23:45 AM

First of all--Gene Whisnant's gut and stuff was unethical and not the American Way, unless you believe that sliding bad legislation without notice through the people's house is the American Way. I would prefer to think that we discuss things here in Oregon, and, we listen to each other. Makes me think that Mr. Whisnant should apply for national politics where the bigger your wallet, the more powerful you can be.

Second--I object to the passage of House Bill 2027 its current state. Do not pass this bill as is. The Upper Deschutes Conservation Council which seems to have hold over Mr. Whisnant has researched (provided) its opposition because they want what they want for themselves.

We still live in a state that encourages all of our needs/thoughts/opinions to be considered. My angry opinion matters. I wish I weren't so angry but I am dead dog tired of politicians caring for the select few, rather than the common American citizen.

Thank you for your attention and your creative response.
