House Bill 2027:

This project to have the bridge connecting both sides of the river has been in the master plan for years.

I want this trail and bridge to go through for the use of tourists and locals and anyone else who chooses to use it.

Each bridge that is planned for in Deschutes County has been a struggle to get passed and built.

This area needs bridges for people to use as this city grows and it will grow.

Please consider this issue and move forward for having the bridge being built.
