Please. I am president of Rockford Grange in Hood River. After near death of this organization we are again thriving and doing important community work.. Disaster preparedness with Hood River County, winter warming shelter, many educational opportunities with the OSU extension center and other partners are examples. WE are volunteers and as usual. It comes down to a few who pull most of the load. The last thing we need is more to do that does not add to our important work of saving this historic building and organization. Please do not burden us with this.

Thank you

Mark England
