I own and live in Lincoln County. We have multiple rentals here in the county. We rent usually to young families who are just starting out on their own and work with them on paying their rent and am willing to postpone payment on rent because it is important that they first take care of their families first. If this bill passes we will sell our rental homes because of this ridiculous burden it will place on landlords who are trying to supply housing for others. The goal of any business is to make a profit or go out of business. Rick Davilla
