

Hi,

I am writing in opposition to HB 2004-A.

This bill does nothing to address the real problem of not enough rental housing in Oregon. There might be a few landlords that are acting in ways that are making it difficult for some tenants. I don't know any personally but appears there are. Most landlords value good tenants and want them to stay.

This bill seems like a knee jerk reaction to avoid fixing the root cause, we need more affordable housing. The question is how is this done and who pays for it.

Jack Hoeck
