Date: Tuesday, May 09, 2017 4:22:38 PM

Chairman Dembrow and Committee Members,

Dianne Brock
60749 River Bend Dr.
Bend, OR 97702
usmvbmc@aol.com

I support NB2027, which prohibits public body or local service district from constructing bridges on the Deschutes River within certain segments of the Deschutes Scenic Waterway.

Proponents of the bridge talk about river access and their desire to complete a trail from Sunriver to Tumalo. We have plenty of river access already.

Why does the trail have to follow the river? Why is it so important to have a trail especially when it comes at the expense of protecting our wild and scenic river and the wildlife living there?

The construction of the bridge alone, not to mention the huge potential traffic will destroy this area as we know it

I desperately think it's imperative that we protect this environmental "gem".

I'm hoping that you will support this bill.

Thank you,

Dianne Brock
