It is well known that government cannot provide affordable housing. Every time they try to build more homes or their apartments end up costing about 3 times as much, it has been proven a thousand times. Every time there is a restrictive law punishing the land owner, there is less incentive to build or to invest into new or affordable housing. HB2004 will kill the goose that lays the golden egg. You liberal hens that control our state will be crying FOUL waving your arms asking what you are going to do about the diminishing middle class, the working poor, and homeless that you misguidedly created by your idea of fairness.
